

Reinforcement Learning-based Re-tasking

D. Josyula

Department of Computer Science

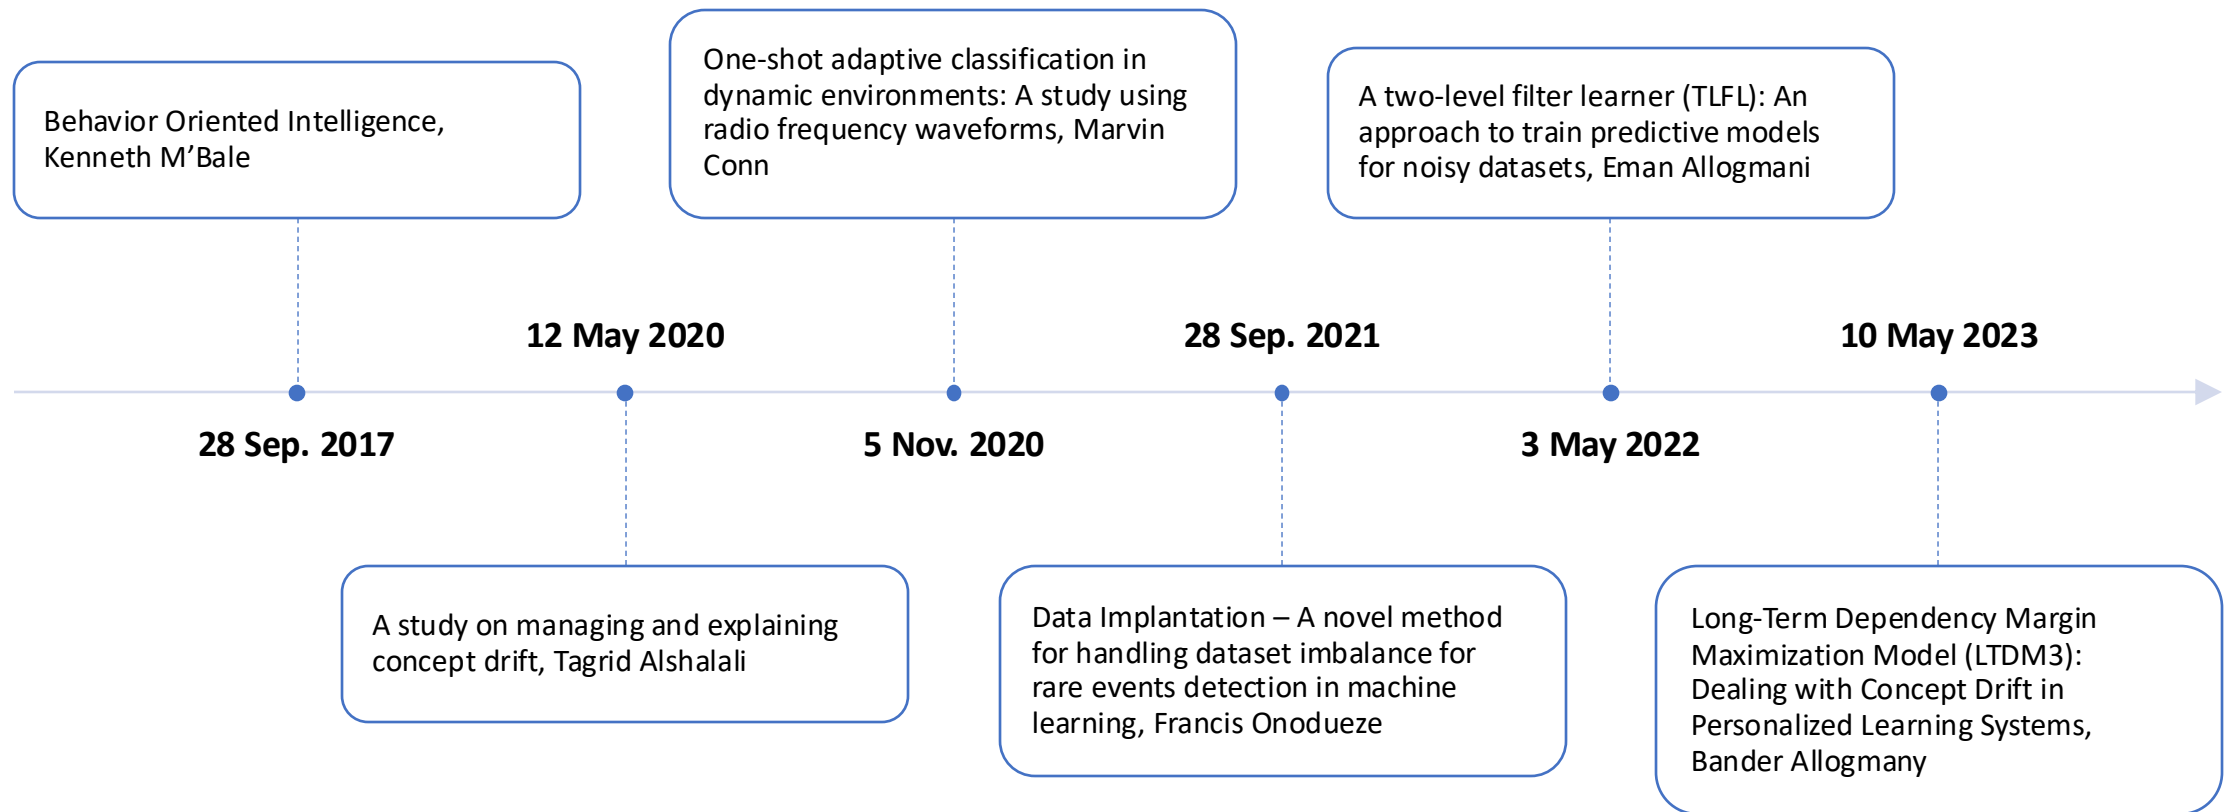

Bowie State University

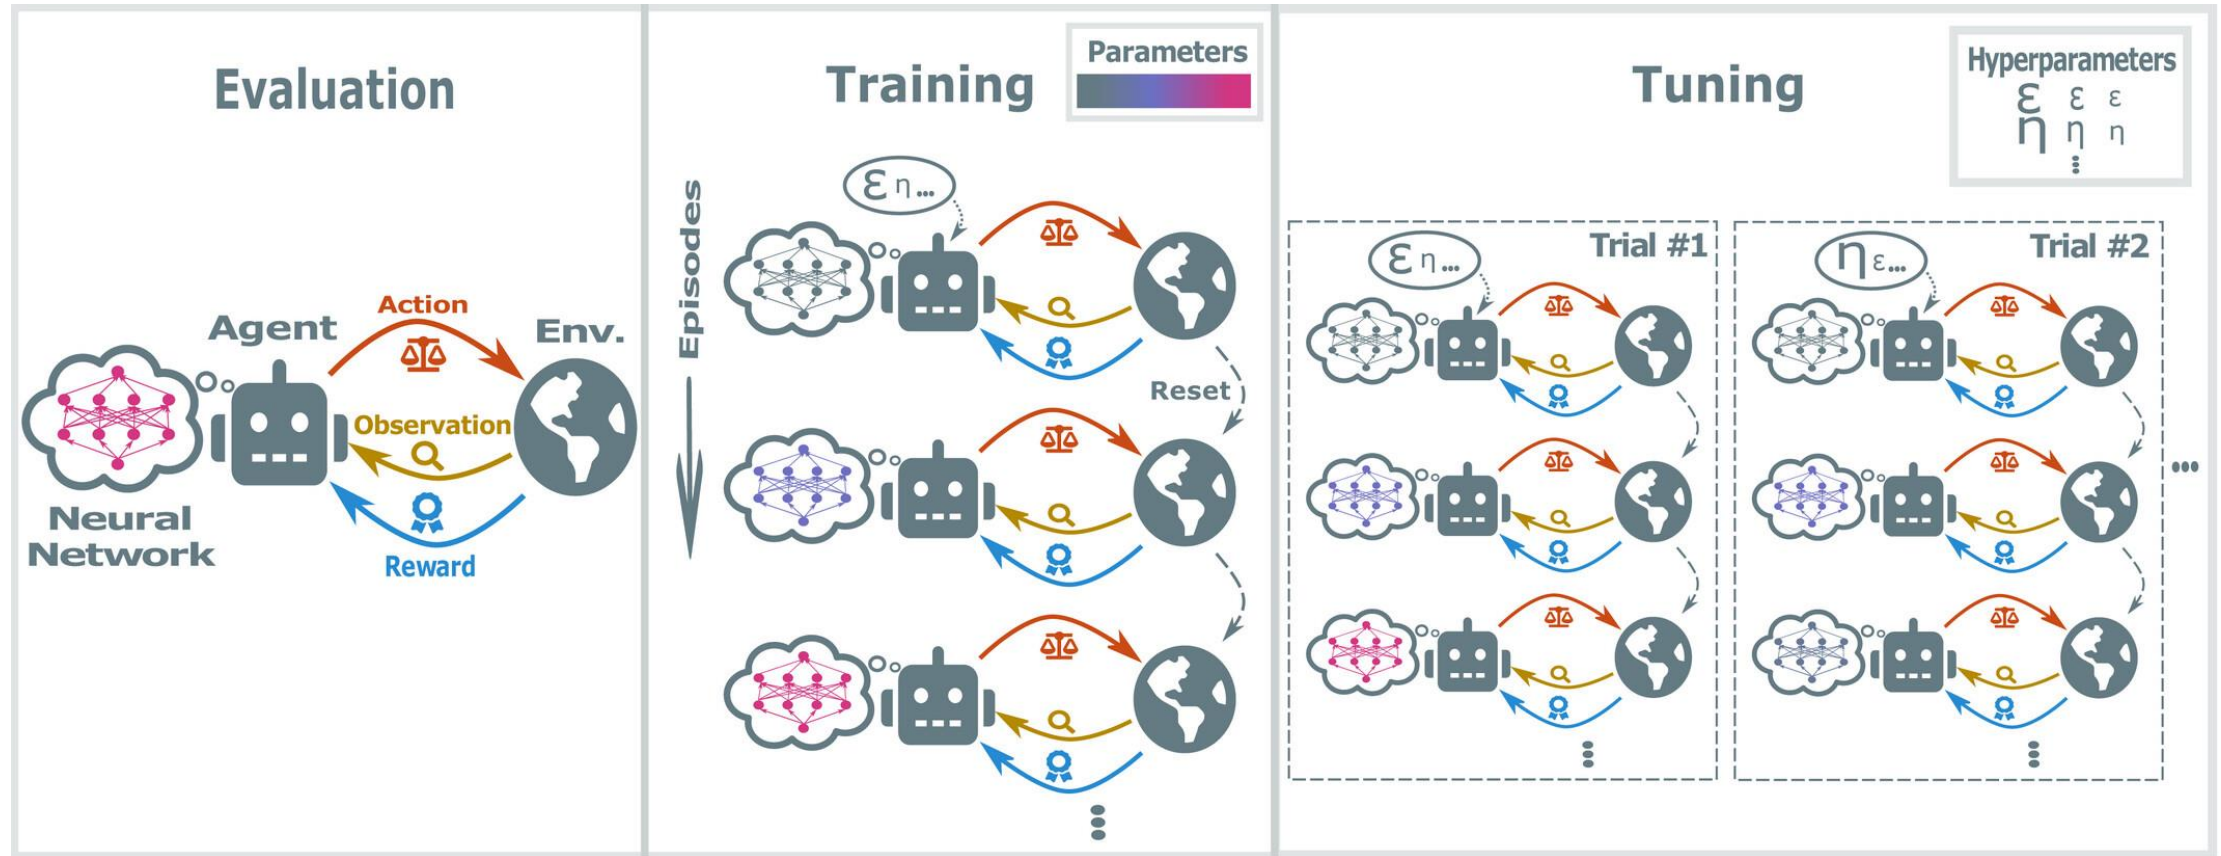

D. Josyula – Brief Bio

- Primary research area – Self correcting/ Self- adaptive autonomous systems
- BSU Autonomous Technologies Lab (BSU@Lab)
- Ongoing research:
 - Learning framework for Acoustic data classification, anomaly detection and autonomous adaptation
 - Novelty detection, computing in SWaP constrained edge devices, contested environments
 - Perturbation tolerance in collaborative target search
 - Conflicting information, theory of mind, expectation violations, limited communication

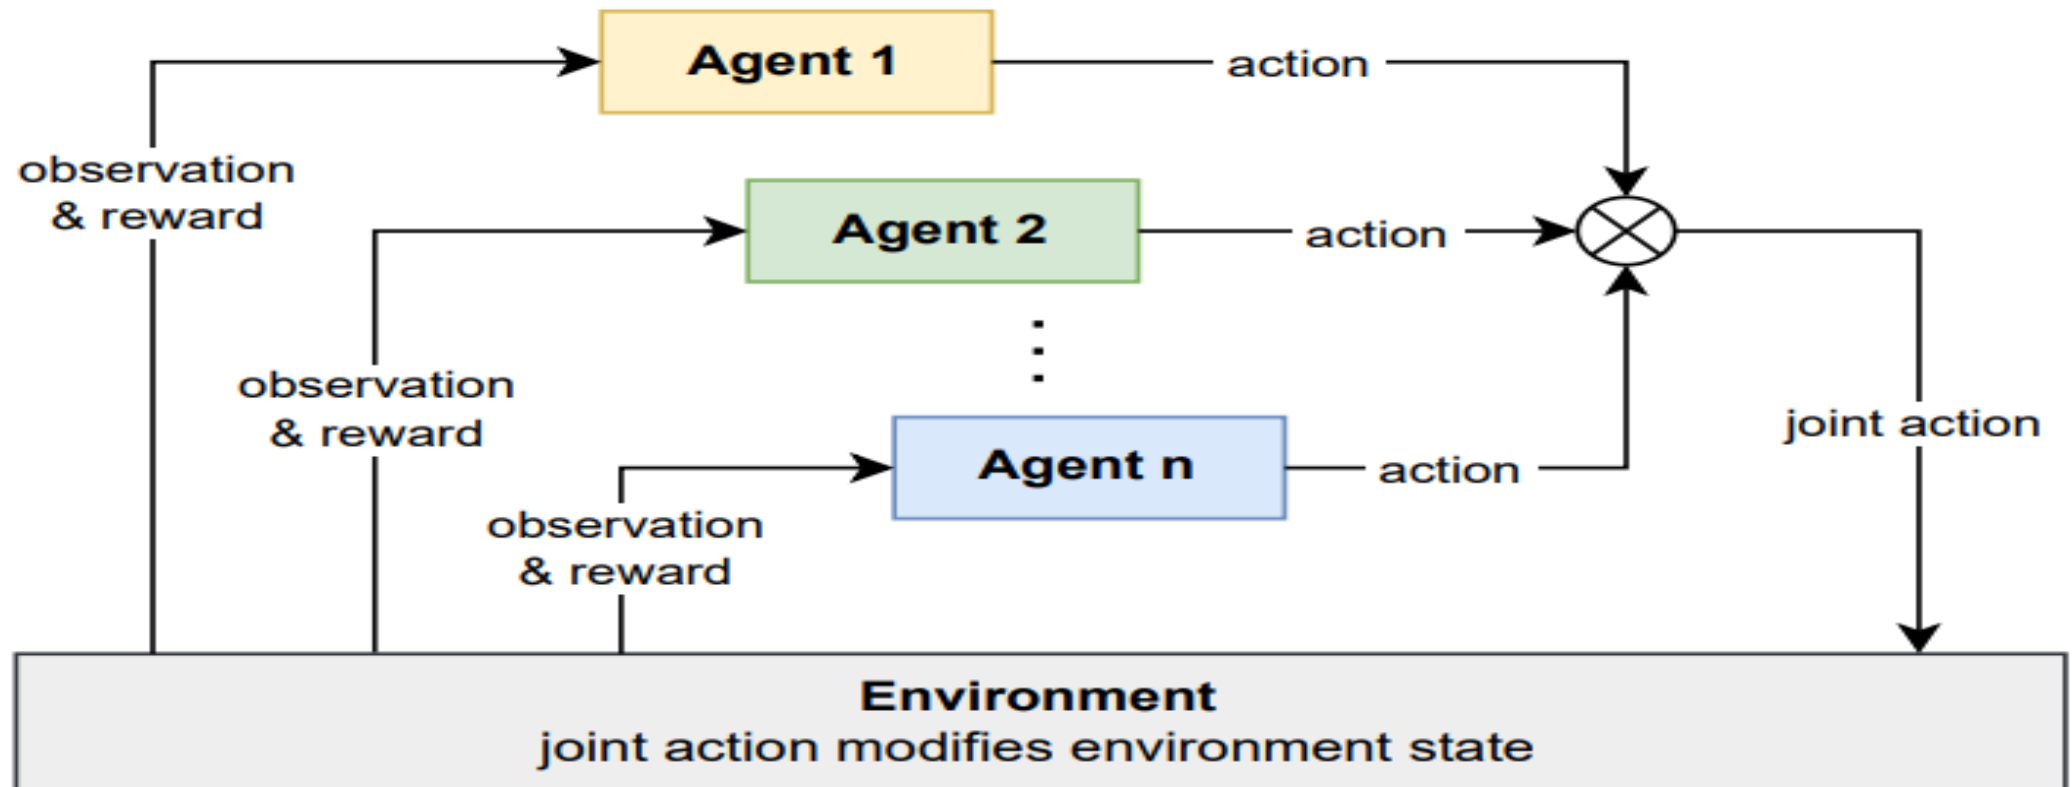

D. Josyula – Dissertations supervised

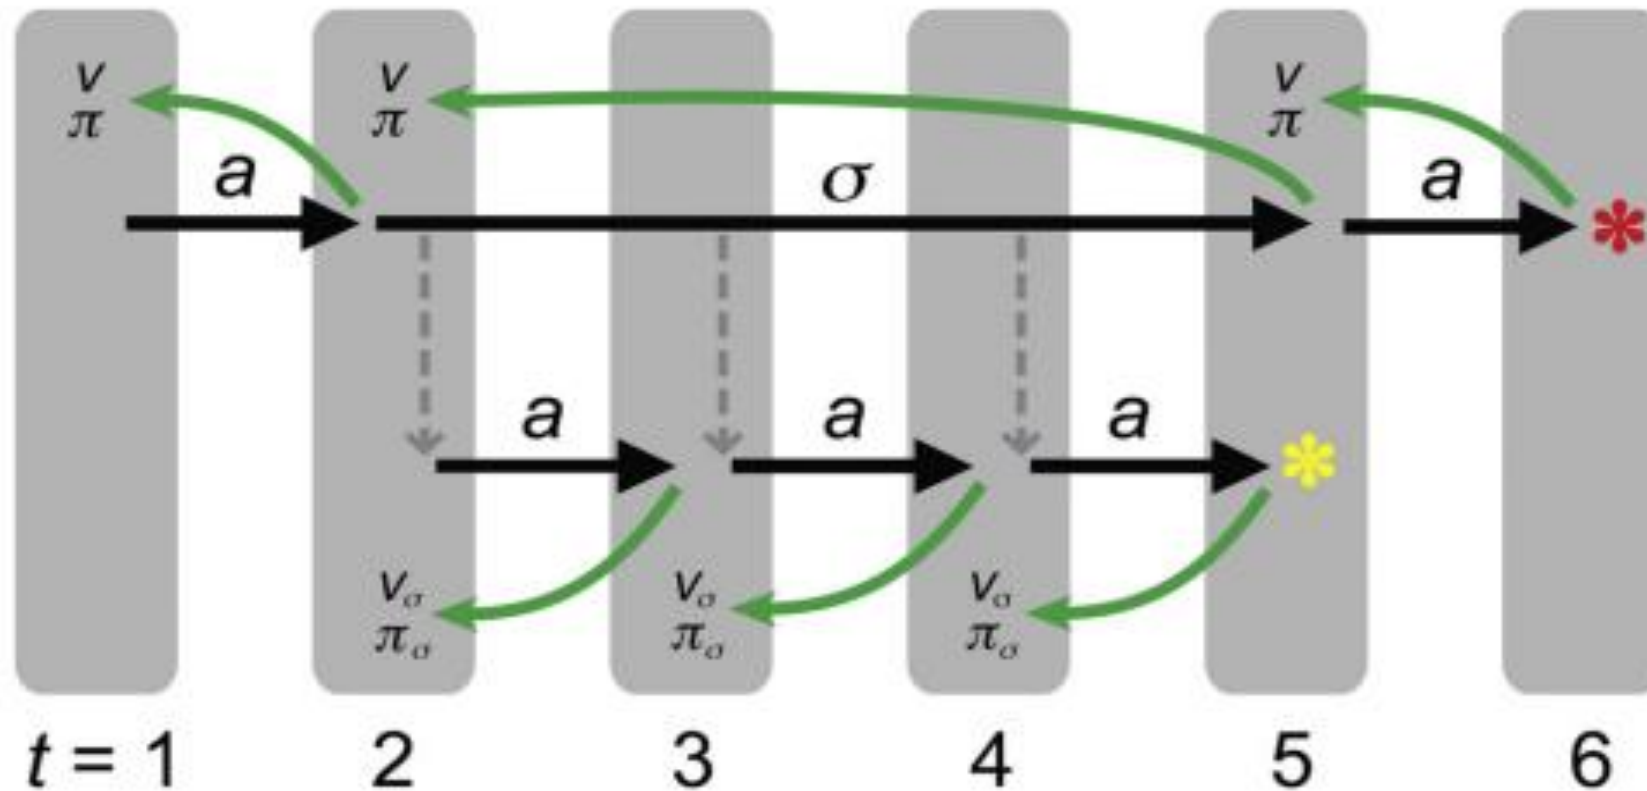

Deep RL for CoA Re-evaluation

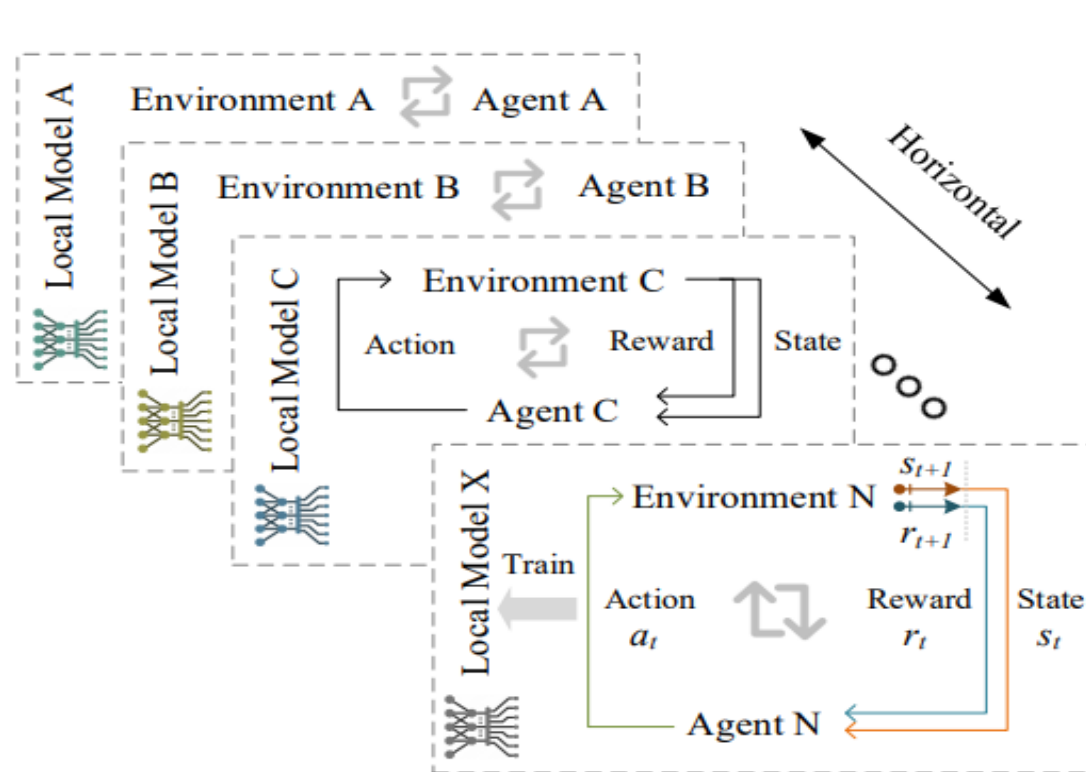

Multi-agent RL for Agent Re-tasking

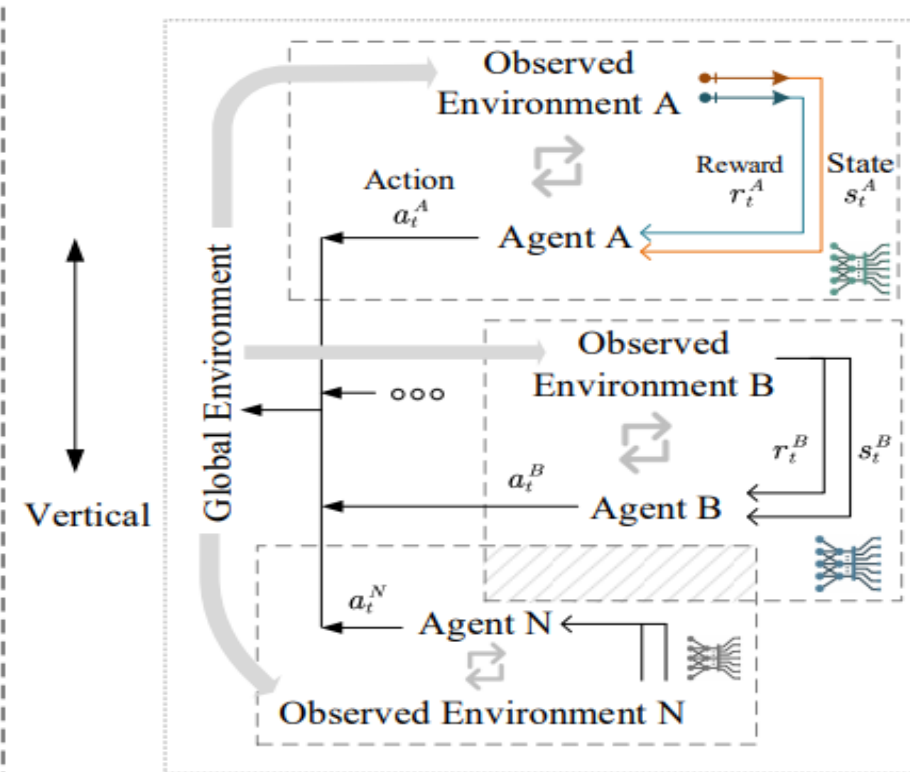

Hierarchical Reinforcement Learning

Federated Reinforcement Learning

Horizontal Federated Reinforcement Learning

Vertical Federated Reinforcement Learning
